DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114.

Response to Amendment

2. Applicant's amendment filed June 10, 2004, has been entered. Claims 15 and 23 have been amended as requested. The pending claims are 15-28.
3. Said amendment is sufficient to overcome the prior art rejections of claims 15-28, as set forth in sections 4 and 5 of the Final Rejection mailed December 11, 2003. Specifically, the limitation of "exclusively mechanically anchored" excludes the teachings of Shimono (US 6,057,023), wherein an adhesive backcoating is applied to anchor the pile yarns.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Art Unit: 1771

5. Claims 15-28 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claims contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

As noted in the Advisory Action of June 7, 2004, and as discussed in the interview of June 30, 2004, the new limitation of “exclusively” is considered a negative limitation that does not find support in the specification. As such, it is considered new matter. Also as discussed in the interview, it is suggested applicant amend the claims to positively recite the nature of “mechanically anchored” rather than employing the negative limitation “exclusively.”

Claims 15-28 are also rejected under 112, 1st as containing new matter of “curled.” As noted in said Advisory Action, the specification teaches the fibers may be “crimped,” but the scope of “crimped” and “curled” are not equivalent. Thus, claims 15-28 are rejected for containing new matter.
